DETAILED ACTION

Specification

The specification is amended.

Double Patenting

Arguments are persuasive, and the nonstatutory double patenting rejection is withdrawn.

Allowable Subject Matter

Claims 1-13, 15-17, and 22-51 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 1, relevant prior art of record did not disclose, alone or in combination, a multi-domain liquid crystal display device as claimed comprising: "a dielectric structure on a second substrate, the dielectric structure dividing each pixel region into a plurality of domains; at least one or more additional structures formed at an end portion of the dielectric structure within the pixel region" (Please note Applicant's arguments on pages 3 and 4 of Paper No. 17, see item 53 in Figure 4 of the instant Application, and Figure 7G of Kim et al (Kim) USPAT 6,356,335 B1). The closest combination is Koma, USPAT 5,608,556 in view of Matsuyama et al (Matsuyama) USPAT 6,081,315. However, Matsuyama teaches an aperture (with dielectric material in the aperture) rather than a dielectric structure on a second substrate.

Art Unit: 2871

As to claim 12, relevant prior art of record did not disclose, alone or in combination, a multi-domain liquid crystal display device comprising: first and second substrates; a plurality of gate lines on the first substrate in a first direction; a plurality of data lines formed in a second direction to cross the first direction; a plurality of thin film transistors formed in a portion where the gate lines cross the data lines; a plurality of pixel regions between neighboring gate and data lines; a common auxiliary electrode around each pixel region; a plurality of pixel electrodes formed in each pixel region to connect with the thin film transistors; a dielectric structure on the second substrate, the dielectric structure being applied electric field with the common auxiliary electrode and being divided the pixel region into at least four domains; at least one or more additional structures formed at an end portion of the dielectric structure within the pixel region; an alignment film on at least one of the first substrate and the second substrate; and a liquid crystal layer between the first substrate and the second substrate.

As to claims 13 and 15-17, they are dependent upon claim 12 with allowable subject matter above.

As to claim 23, relevant prior art of record did not disclose, alone or in combination, a multi-domain liquid crystal display device as claimed, comprising: a common auxiliary electrode around each respective pixel region; a dielectric structure in at least one of the pixel regions, the dielectric structure having two end portions and a middle portion, the end portions each having a U shape with an apex, the apexes

Art Unit: 2871

connected to one another by the middle portion. The closest combination is Koma in view of Matsuyama, but they do not disclose the claimed structure.

As to claim 36, relevant prior art of record did not disclose, alone or in combination, a multi-domain liquid crystal display device as claimed, comprising: a common auxiliary electrode around each respective pixel region; at least one electric field induction window in a corner portion of at least one of the pixel regions. The closest combination is Koma in view of Matsuyama, but they do not disclose the claimed structure.

As to claim 41, relevant prior art of record did not disclose, alone or in combination, a multi-domain liquid crystal display device as claimed, comprising: at least one of the pixel regions including three subregions; a common auxiliary electrode within each subregion, the common auxiliary electrode having a hexagonal shape; a thin film transistor in each of the pixel regions. The closest combination is Koma in view of Matsuyama, but they do not disclose the claimed structure.

As to claims 2-11, 22, 24-35, 37-40, and 42-51, they are directly or indirectly dependent upon claims with allowable subject matter above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2871

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

References cited but not applied are relevant to the instant Application.
